MASSACHUSETTS STATE BOARD THE NAMES OF THE ALUM LISHED - THE METHODS BY AME SOLD NECESSITY FOR BELL FOOD LAW.

10-11 ... Mars its State Board of Health, The State First Commission of Obio, the alum powders within its jurisdiction as the y to prohibit the sale of

what it classes as a detrimental article of

The report names twenty seven brands of alam baking powders detected, many of which will be recognized by housekeepers who have been using them under the representation that they were pure and wholesome cream of tartar baking powders.

Being cheaply made these goods are sold to the retail dealer at a price that affords him a large profit, and the retail dealer, probably unaware of their nature, is induced to push their sale in place of pure powders upon which the profits are smaller. In this way they are being placed in considerable quantities into the hands of consumers who

have not a suspicion of their real character.

Alum baking powders have been legally declared adulterated articles of food in the State of New York, and several parties have been convicted of violating the food adulter-

ation laws in selling them, The prevalent method of disposing of these goods where it is not prohibited by law, is by accompanying each package with a gift or lottery ticket. In several States acts have been passed making this a misdemeaner. In such localities manufacturers of alum baking powders who regard the law have been compelled to reduce the price from 30 or 40 to 20 cents per pound, at which rate they are now generally sold without a gift. As an illustration of the low value of the alum baking powders, the fact is stated that one of them, no worse then is stated that one of them, no worse than the others, is sold at 5 cents a pound. The extent to which the poorer classes, who are their chief users, are imposed upon when they are charged from 20 to 40 cents for a similar article is quite apparent.

The following are the names of the alum baking powders as given by the reports of the Massachusetts State Board of Health: ALUM BAKING POWDERS

Davis's. A. & P. Henkle, Silver Star. Silver King. Ne Plus Ultra, Welcome, Enterprise, Can't Be Beat, Old Colony. Eureka, International. Albany Favorite, Golden Sheaf.

Crystal. Centennial. Windsor, Sovereign, Burnett's Perfect, Geo. Washington, Fleur de Lis. Feather Weight.

Thile many of the alum baking powders named are only known locally, others are found in almost all sections of the country. Those of largest sale are made in New York and Ohio. An avoidance of the brands named by the Ohio and Massachusetts State authorities, will not insure against the use of the objectionable articles altogether, for the manufacturers when the fact is published that a particular brand tontains alum, will simply change the name, and the sale goes on as before. Large quantities of these goods are also sold in bulk, by weight while there are hundreds of different brands put up by small dealers in different parts of the country where the public analyst is not

Official examinations like those by the Massachusetts and Ohio authorities, which give reliable information as to the real qualities of articles of food and furnish a guide by which consumers can determine the pure and wholesome from the impure and daugerous without chance of mistake, are of great public benefit.

The Massachusetts analysts have tested the various cream of tartar and phos-phatic baking powders sold in the State, and their report that the Royal baking powder is superior to all others in purity and wholesomeness, and contains nearly 20 per cent more strength, than any other, is quite as important to consumers as the information relating to the alum powders. The exact determination as to strength of the several brands was as follows, the figures mepresenting the number of cubic inches of leavening gas from one ounce of powder: Royal, 126.15; Cleveland's, 107.7; Congress, 81.2;

A very earnest effort is being made to se-cure the passage by Congress of a law that shall foster the trade in pure food. The proposed law provides for the examination of manufactured articles of food, drink, and drugs, and for the publication, in the manner already adopted in Ohio and Massachusetts, of the names of those brands found adulterated or injurious to health. A law of this character, that shall impose suitable penalties upon importers and manufacturers of such commodities, will be of vital importance to the whole country.

PURE JERSEY or ALDERNEY MILK.

**GLASS BOTTLES!** 

PURE JERSEY or ALDERNEY MILK in QUART GLASS BOTTLES will be delivered by me, and the patronage of the public is solicited. The Milk offered is warranted perfectly pure, and is from imported Jersey Cattle.

The Cattle are fed on the BEST of hay and feed, no feed being allowed them that would impair the healthfulness of the Milk. The stables and cattle are kept in the most perfect manner as to Cleanliness and Ventilation-a most important factor if healthy milk is desired. As a table article.

and beverage it recommends itself, showing a larger percentage of cream than any other Milk sold. For invalids and children it is recommended by all physicians. MILK IN GLASS HAS THE FOLLOWING ADVANTAGES 1st. It is more cleanly not being exposed to odors and contamination, to blowing dust and dirt, to the rain, to the drip and dirt from the reins or hands of the driver. 2d. Its quality may be seen at a glance by the cream at the top, and the color of 3d. It will keep sweet longer, because in delivering there is no churning (each

bottle being filled to the stopper,) and the bottles are kept iced in warm weather until 4th. Its flavor is better, because the air has no chance to act upon it, and because it is absolutely free from the metallic flavor often noticed in milk transported Parties wishing to be served can call at farm in Bloomfield, or send postal to
